DISTEC with Video Conference Opportunities

DISTEC has recently installed a video conferencing system to enhance communications worldwide.

The in-person element that video conferencing offers will greatly enhance our communications with our clients, suppliers and branches around the globe.

It enables us to react very quickly to market requirements, to exchange information promptly and to pursue developments together as a team.

Offering simultaneous exchange of pictures, sound and data, a video conference is the ideal method to do discussions over any distance and at any time.

The installation of a video conference system reflects DISTEC's global commitment and our strong focus on being close to the customer as much as possible.

We invite you to join us in a video conference. Please contact us in advance to set up a time.

You can connect with us under the following IP addresses:

DISTEC Heinsberg, Germany:	IP 80.152.220.170
DISTEC Shanghai, China:	IP 222.68.183.234
DISTEC Americas/US, Minneapolis:	IP 209.150.209.241

DISTEC Sales & Marketing reachable via Skype

From wherever you want: Now you can reach the DISTEC International Sales & Marketing team via Skype.

Just add "distecgermany1" to your Skype contacts, and you can reach us through the Internet quickly, easily and at no cost.

In addition to the installation of the video conferencing system, the newly-created Skype terminal in the International Sales & Marketing Department is a further means of offering added value to our customer contacts and communications worldwide.

We are very much looking forward to hearing from you through Skype!

DISTEC's at EuroShop 2008

Digital signage usage is proliferating in shop design and in-store advertising in many parts of the world.

In response to this development, DISTEC will exhibit at EuroShop 2008 in Düsseldorf, Germany. We will showcase our in-store potential, and exhibit our "total solution" capabilities, including:

- Top- quality digital hardware and housings
- Content management
- Functionality of digital networks
- Strategic alliances with key partners

In addition to other products, such as our 6-sheet display with an 82" LCD screen, we will show LCD panels with optically-bonded anti-reflective glass layers, suitable for both interior and exterior use, in sizes of 57" and 70". These panels are sunlight readable, have vandal-proof and maintenance-friendly housings, and in addition are equipped with an ambient light control. The integral media-player provides wireless access for network content management.

Various interfaces are possible and the products offer an excellent cost-performance ratio.

Photos will of course be posted on our website after the show.

Come and join us at booth 3B94 in Hall 3!

We are very much looking forward to visiting with you in Düsseldorf!

Merry Christmas and a Happy New Year!

We wish you, your colleagues, friends and families

Merry Christmas

Happy New Year!

We will be closed between Christmas and the New Years, and will be back at your service on January 2nd, 2008.

DISTEC

EuroShop 2008

Düsseldorf

23.—27.02.2008
